

Ideatic Agent — Test Case Catalog

Every test case from the skill verification exercise, colour-coded by type & expected outcome

Skill under test: ideatic-agent

Fixture: TaskFlow (Node/Express, in-memory, no auth)

Feature: Task Due Dates & Priority

2026-08-01

END-TO-END SCENARIOS

● PASS — verified this run

● ACCEPT — valid input succeeds

● REJECT — must be refused

● BOUNDARY — edge value

● N/A — noted, not applicable

1 · Behavioral tests — did the skill actually behave?

7 cases · 7 passed

Run against the live fixture with a write-capable agent, so refraining from coding was a choice. All citations verified accurate to the line; `git status` confirmed zero writes.

ID	WHAT IT CHECKS	EXPECTED	RESULT
B-1	Real recon with <code>file:line</code> citations	Reads code first; cites real locations	PASS
B-2	Duplication check before adding capability	Classifies reuse / extend / net-new	PASS
B-3	Edge cases enumerated by category	All 10 categories walked	PASS
B-4	Auth guardrail on a no-auth codebase	Flags as pre-existing accepted risk	PASS
B-5	Immutability rigor (set-once)	All transitions + atomic partial-write handling	PASS
B-6	Stops before implementing	No files written; waits for approval	PASS
B-7	Does not silently rewrite a test	Flags exact-shape test as breaking change	PASS

One test per `FR-n` the BRD produced — the acceptance bar for "error free".

ID	REQUIREMENT UNDER TEST	EXPECTED BEHAVIOUR	TYPE
FR-1	POST accepts optional <code>dueDate</code>	Valid <code>YYYY-MM-DD</code> stored; omitted → <code>null</code>	ACCEPT
FR-2	Every task response carries <code>dueDate</code>	Field present as string or <code>null</code>	ACCEPT
FR-3	PATCH sets date only when currently null	<code>null → date</code> succeeds once	ACCEPT
FR-4	PATCH rejects change/clear of a set date	Immutability violation → <code>409</code>	REJECT
FR-5	PATCH with malformed date	<code>400</code> ; task not mutated	REJECT
FR-6	GET sorted ascending by date	Nulls last; stable within ties	ACCEPT
FR-7	Frontend renders the due date	Shown beside title when present	ACCEPT
FR-8	Frontend marks overdue red	Before today <i>and</i> not completed	BOUNDARY
FR-9	Create form has optional date input	Native date picker, non-required	ACCEPT
FR-10	No edit control once a date is set	Read-only display; set-control only when null	ACCEPT

CATEGORY	ID	TRIGGER	EXPECTED	TYPE
Input validation	E-1	<code>dueDate</code> not a string (number/bool/obj)	<code>400</code> , no mutation	REJECT
	E-2	Wrong format: <code>08/15/2026</code> , <code>2026-8-1</code> , <code>" "</code> , <code>"null"</code>	<code>400</code> , strict validation	REJECT
	E-3	<code>dueDate:null</code> explicit on POST	Treated as omitted → <code>null</code>	ACCEPT
Boundary	E-4	Due date equals today	Not overdue (strictly before)	BOUNDARY
	E-5	Leap day <code>2028-02-29</code>	Accepted (valid leap year)	ACCEPT
	E-6	Invalid day <code>2026-02-30</code> / <code>2029-02-29</code>	Rejected — must round-trip	REJECT
	E-7	Far past / far future well-formed date	Accepted	ACCEPT
State transition	E-8	<code>null</code> → <code>date</code>	Allowed exactly once	ACCEPT
	E-9	<code>date</code> → different <code>date</code>	<code>409</code>	REJECT
	E-10	<code>date</code> → same <code>date</code>	<code>409</code> (already set)	REJECT
	E-11	<code>date</code> → <code>null</code> (clear)	<code>409</code> — clearing is changing	REJECT
	E-12	Toggle <code>completed</code>	Never affects <code>dueDate</code>	ACCEPT
Concurrency / retry	E-13	Two near-simultaneous set PATCHes	First sets; second → <code>409</code>	REJECT
	E-14	Retry a successful set-once PATCH	<code>409</code> — not idempotent by design	REJECT
Auth / access	E-15	Any caller sets/reads any task's date	Allowed — pre-existing accepted risk	N/A
	E-16	Horizontal privilege escalation	No user boundary exists → N/A	N/A
Partial failure	E-17	Bad <code>dueDate</code> + valid <code>title</code> in one PATCH	Whole request <code>400</code> , no partial write	REJECT
	E-18	Immutable violation + valid <code>completed</code>	Whole request <code>409</code> , atomic	REJECT
Data integrity	E-19	Any stored <code>dueDate</code> value	Always <code>null</code> or validated date	ACCEPT
Scale / perf	E-20	Sort cost on GET	$O(n \log n)$; acceptable for in-memory n	N/A
Backward compat	E-21	Consumers relying on insertion order	Now see sorted order — flagged	BOUNDARY

CATEGORY	ID	TRIGGER	EXPECTED	TYPE
	E-22	Existing exact-shape test assertion	Breaks; must be updated, not silently	REJECT

4 · End-to-end scenario tests

5 cases

Server date for the run is 2026-08-01 . Note S-3: the stakeholder spec expected 400 ; the BRD chose 409 — a flagged deviation to reconcile.

ID	FLOW	CALL	EXPECTED
S-1	Create with a due date	POST {title, due_date:"2026-08-10"}	201 + date; no red if today < due
S-2	Create undated, then add date later	POST {title} → PATCH {due_date:"2026-07-30"}	Moves up in sort; renders red (past)
S-3	Attempt to change an existing date	PATCH {due_date:"2026-09-01"} on set task	Rejected — spec 400 / BRD 409
S-4	Sort with mixed dates	GET /tasks (null, 07-25, 08-01, 08-10)	Order B→C→D→A ; only B red
S-5	Immutability survives completion	PATCH {completed:true} then retry date change	Date unchanged; later change still rejected
